

# MEETING REPORT

**Group:** VB

**Date of Meeting:** March 29 2021

**Start Time:** 11:00

**End Time:** 12:30

**Meeting Location:** Discord

**Moderator:** Louis Ziko

**Recorder:** Klevis Ngjela

**Other Members Present:** Redon Basha, Kristi Cuni, Glaud Godeni

**Members Absent:** Jusild Kadri

## **Topics Discussed:**

- Discussed on which project topic to pick
- Discussed on what technologies to use for each project
- Discussed how to organize communication
- Discussed how to organize task assignment
- Discussed team roles
- Discussed team name

## **Decisions Made:**

- We selected two main topic for the project:

- Game

The first idea that was proposed was to make a game. Some of us have had experience building games so this was liked by all. The idea was to build a 2D action-adventure game, with a main character that will explore the map doing quests, receiving new skills, leveling up, fighting enemy bosses and meeting NPC.

- Compiler

One of the ideas that was proposed was a simple compiler for a custom programming language with a VM similar to Java. However this one was put at the back of the list because of the technical difficulty.

- To assign the task for everyone we decided to use Trello web-app, because it will be more organized.

- For the name of the team we decided to call our team “ Isekai ”

- Team captain elected: Louis Ziko

## **Time, Place, and Agenda for Next Meeting:**

- Next meeting April 05 2021 on discord
